

ISOVOLT Titan|neo

Robust, reliable stationary X-ray generators

The ISOVOLT Titan|neo generator powers a range of radiographic inspection technology—delivering the most reliable, consistent results in even the highest accuracy applications. So you can increase precision and inspect multiple parts each day even in 24/7 Testing Machines applications.

Increased reproducibility: Reduce exposure times for various materials in several operation modes with high, stable radiation and fluctuations <0.05%.

Greater dependability: An extended tube range and maximum current ensure enhanced imaging contrast and high penetration power.

Unmatched flexibility: Its modular design includes intelligent tube integration and permanent system monitoring—offering unmatched ramp-up times* and a 100% duty cycle for continuous operation in inline systems**.
